SAFFRAN MAKKAR

AI/ML Engineer · Python · Generative AI · Workflow Automation

Delhi NCR, India | saffran.makkar@gmail.com | +91 7042811655 | linkedin.com/in/saffran-makkar | github.com/saffzy

Summary

AI/ML Engineer with 1+ year of applied experience building and deploying LLM powered systems, from agentic workflows and RAG pipelines to production automation in Python, FastAPI and n8n. Experienced with prompt engineering, locally hosted and API based models, and integrating AI agents with live business systems for enterprise clients across multiple domains. Comfortable across the full path from model selection to deployment.

Technical Skills

- **AI/ML:** LLM Integration, Prompt Engineering, Agentic AI Workflows, RAG, Hugging Face, Machine Learning, Deep Learning, Generative AI
- **Data:** Pandas, NumPy, Matplotlib, Data Preprocessing, EDA, Data Visualization, ETL
- **Backend & Automation:** FastAPI, REST APIs, Webhooks, n8n, Make, Playwright, Docker, Tilt
- **Languages & Tools:** Python, SQL, Git, GitHub, Azure, Jupyter Notebook, VS Code, Google Colab,Microsoft Fabric

Experience

AI/ML Engineer (AI Evangelist), Alletec — April 2026 – Present

- Built and deployed 8+ AI automation workflows across travel and sales operations using Python, FastAPI and n8n, reducing manual processing time by approximately 40%.
- Delivered analytics solutions for MakeMyTrip, Veeba Foods and Somany Tiles on Microsoft Fabric, building ingestion and transformation pipelines across 5+ data sources powering 10+ business reports.
- Integrated LLM based agents with internal APIs and webhooks to automate lead qualification and query routing, cutting response turnaround from hours to minutes.

Python AI Intern, Chirpin IT — Feb 2026 – April 2026

- Built a reusable Python framework and the web application layered on top of it, standardising API handling and data validation across core modules.
- Developed and optimised the core QA agent using Python, FastAPI and structured prompting, improving automated query resolution accuracy by roughly 25% over the baseline implementation.

AI Engineer Intern, Smartians AI Pvt. Ltd. — Sep 2025 – Dec 2025

- Designed 6+ AI automation workflows in n8n integrating Gmail, Google Sheets and OpenAI APIs, removing approximately 10 hours of manual backend work per week.
- Built and deployed an end to end web application with a Python backend and REST APIs, handling user authentication and data operations in production.

Projects

Automated Application Tracker System — Sep 2025 – Nov 2025

- Engineered an email processing pipeline that parses inbound applications, scores resumes against role criteria using a locally hosted LLM, and auto sends rejection responses below a defined threshold, processing 100+ resumes in minutes versus hours of manual review.
- **Stack:** n8n, Python, Llama 3 (Ollama), Webhooks, Gmail API

FindMyWorker: Blue Collar Job Marketplace — Feb 2025 – May 2025

- Built a web platform connecting skilled workers with clients, implementing search, filtering and profile matching to reduce the time clients spend finding qualified workers in their area.
- **Stack:** Python, HTML, CSS, JavaScript, SQL

Education

KR Mangalam University, BTech CSE (AI/ML) — Sept 2022 – June 2026

Coursework: Machine Learning, Deep Learning, DSA, DBMS, Operating Systems, Computer Networks

Certifications

Microsoft Azure AI Fundamentals (AI-900) · Google Generative AI · IBM Python 101 for Data Science · IBM Data Visualization with Python · TATA Data Visualization
